lean six sigma at work for you

Data Driven Problem Solving

In today's competitive environment, having a spreadsheet of data is not enough to make the complex decisions which will have an impact on your business' bottom line. A wrong decision might not only cost you money and time, it may cost you your business. Business data is supposed to help us make better decisions, right? But how many times do we find ourselves frustrated because we have either too much data or not the right data to help us? A recent poll indicated that 67% of managers felt overwhelmed with the amount of data that they have to go through each day. That same poll indicated that the majority of managers wished they had better data to make day to day decisions. Do any of these situations sound familiar?

Lean Six Sigma is a business philosophy that relies upon data driven problem solving techniques. Lean Six Sigma is used in the manufacturing, service and health care industries to increase quality, performance and net profits. When applied properly, LSS has shown to be a proven business management philosophy which brings about sudden and dramatic positive changes.

flexible solutions for your business needs

Practical Solutions to Help Your Business Grow

L6S SOLUTIONS

Lean 6 Sigma Solutions (L6SS) is an operational improvement firm who works with corporations to improve their processes and financial performance through six sigma and lean techniques. L6SS delivers solutions to help your company integrate and unify the multitude of actions taken to improve performance through discrete efforts targeted at specific areas or problems. L6SS consulting uses industry specific professionals to help you solve process and transactional problems and deliver a measurable and sustainable financial benefit that is guaranteed. That is, if your company does not see the bottom line improvement by implementing the proven process enhancement program we have identified, then you don't pay. It is that simple. L6SS can provide your company immediate efficiency benefits that will add value to your bottom line. We guarantee it!

L6SS, Inc. was founded by a group of six sigma and industrial engineers that have a passion for quality and solving customer problems. What sets apart L6SS from other consultants is that we literally partner with you in the financial success of your company. "Our Success Is Your Success" is not only our motto but also our guarantee to you in the service we provide. L6SS utilizes our network of engineering professionals to help us solve your company problems. We have professionals in many different industries. Contact us to see how we can help you.

LEAN SIX SIGMA TRAINING AND IMPLEMENTATION

Unlike many online Six Sigma Training courses, L6SS partners with you throughout your Six Sigma transformation. We develop a plan customized to your business and support you every step of the way by offering online and telephone support for statistical, six sigma project and Minitab questions.

SCHEDULING

Whether you are fast food restaurant manager or a production supervisor at a large manufacturing plant, we all have been faced with scheduling and lead time issues. We can help you optimize your scheduling and manpower issues.

BUDGETING

Life is stochastic. Don't approach another budgeting session with a financial model that does not take into account the many risks and uncertainties associated with any business. Let us help you develop a model with "what-if" analysis (Monte Carlo simulation) and gain an understanding of risk like you have never seen before.

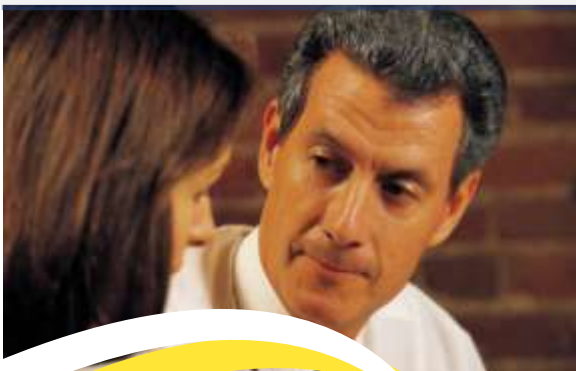

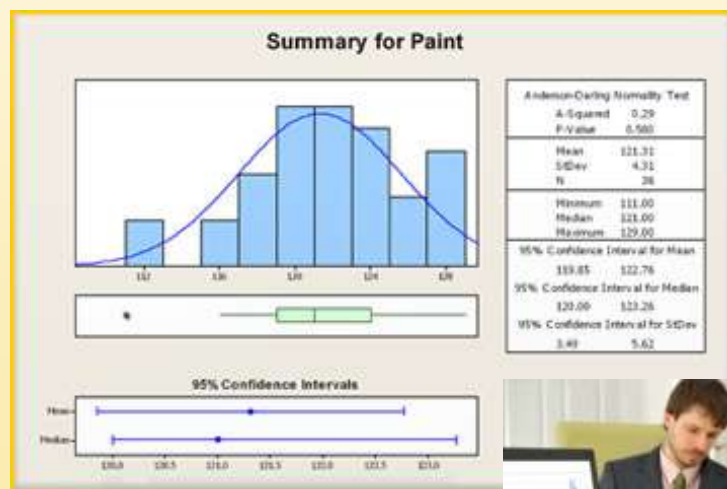

QUALITY IMPROVEMENT SERVICES

Managing quality is the most important aspect of your job and that cost of poor quality is not an expense you can budget. Let us help you uncover hidden quality problems, solve existing ones and help you deliver products that satisfy your customers. You will see processes at greater efficiencies, producing less waste and increasing business productivity. All of this, of course, is tied to cost drivers that we can monitor and show the financial benefits you can measure.

DOES IT WORK?

Still don't know if it is right for your company? Let us perform a free lean assessment of your company. This free initial consultation will show you in detail many of the hidden wastes in your process. Every company can become leaner and more productive; let us help you on that transformation. And remember our guarantee, if you do not see the results that we have recommended, then you do not pay. "That is the 6 Sigma Service Solution".
